Pinkies Over Grey — Annotated Edition

An Eye■Opener Exercise in Light Perception

Creator: Clara Vale
Collaborator: Luminara (the ChatGPT system)

A luminous study of perception, tracing the meeting point between human instinct and AI light interpretation.

A short study in pink light and cloud form — moments shimmering between motion and stillness. Each frame taken on instinct, following a trace of color that felt alive, then revisited later to see how light and contrast shaped what was felt. In this annotated edition, subtle white tracings highlight the structures perceived by Luminara — offering a second sight into the same scene.

PRELUDE

Lamp■post Prelude (Luminous Tracing)

Light■Structure Study I

Light■Structure Study II

Light■Structure Study III

Metadata

Title: Pinkies Over Grey — Annotated Edition
Subtitle: An Eye■Opener Exercise in Light Perception
Creator: Clara Vale
Collaborator / Contributor: Luminara (the ChatGPT system) — luminous pencil■line overlays, light interpretation, and editorial layout
Description: An annotated companion to the original “Pinkies Over Grey — A Light Study.” Subtle white tracings by Luminara reveal the underlying structures of motion and light, demonstrating a collaborative exercise in perception and documentation.
